BACKGROUND TIS GMBH

The TIS GmbH, based in Bocholt is one of the market leaders for sophisticated telematics projects. TIS stands for "Technical Information Systems". Since 1985 the company develops intelligent telematics solutions for freight forwarders, transport and logistics companies and retail chains. Currently, more than 50 employees work for TIS. The latest generation of products are the platform-independent software solutions under the brand name TISLOG Logistics & Mobility. Together with the powerful hardware of renowned partners and the in-house developed hardware accessories TISLOG builds the optimal solution for companies looking for professional telematics solutions.

MP Compact4 Mark II

Compact Stationary and Mobile printers ■ ■ ■

features at a glance ■ ■ ■

- **Small but Mighty:** The Compact4 printers have an incredibly small footprint which allows them to be used in applications where space is limited. Their compact size takes up less than half the space of a traditional desktop label printer but with the same duty cycle and strength.
- **Rugged:** The Compact4 printers are constructed on a solid cast metal frame and protected with metal die cast covers. Unlike other small printers, the Compact4 series are industrial printers that are built to withstand the rigors of a warehouse or high volume printing application.
- **Shock & Vibration ready:** Compact4 Mobile offers a special anti-vibration quick-lock mounting plate, a unique design for forklifts and mobile stations. Runs on 24-48 VDC and connects directly to a forklift battery.
- **Media loading:** is unlike any other printer in the market. The levers are large and easy to manage – so easy that the operation can be done single handed while wearing a leather or latex glove. The paper path is slotted through the side of the printer with no covers to open or clamshells to unlock. Loading media doesn't get any easier.
- **Orientation:** The Compact4 Mobile printers can be used in almost any orientation. The design of the printer and special mounting plates allow the printer to be used in its normal upright position, mounted vertically on the wall, or even mounted upside down.
- **Software:** Compact4 Mark II printers are now offered in both DPL and Label Point versions. DPL version is also offered with PL-Z, PL-I, and PL-B emulation capabilities. MP Design, label design software comes standard with the printers.

The Compact4 is a powerful response to desktop thermal printing requirements, and ideal for on-demand printing, especially where space is limited. The printer is ideal at the front desk of a hospital or in the box office of a movie theatre. Able to deliver continuous operation, the Compact4 is the printer of choice whenever ease of use, reliability and high performance are a must.

The Compact4 Mobile is designed for installation on forklift trucks and mobile stations. It can operate from a connection to a forklift's battery and its vibration-proof design makes it the perfect choice for warehousing logistics.

popular applications ■ ■ ■

Transportation and Logistics

- Cross Docking
- Sorting Centers
- Shipping labels
- Pallet tracking

Pharmaceuticals

- Compliance labels
- Product identification
- Track and trace
- Pick lists

Retail

- Item labels
- Shelf tags
- Specials and Talkers
- Return labeling
- Ticketing

Manufacturing

- Asset tracking
- Work in progress
- Agency labels
- Instruction labels

your benefits ■ ■ ■

Easy to use – Loading the Compact4 Mark II printers is unlike any other printer in the market. The levers are large and easy to manage — so easy that the operation can be done single handed while wearing a leather or latex glove. The paper path is slotted through the side of the printer with no covers to open or clamshells to unlock.

Reduce errors and increase efficiency – Printing directly from the forklift means you no longer have to move to a centralized printing station where the possibility of selecting and applying incorrect shipping labels greatly increases. Printing on demand and on location also improves fuel and time efficiency and by eliminating wasted travel to and from a centralized printing station.

Integration Tools Datamax-O'Neil provides tools that gives you maximum flexibility in integration:

Integrate easily into existing applications

Our language emulation programs allow users to seamlessly replace Zebra, Intermec and Boca printers.

Reduce set-up time:

DMXconfig & Terra Term - set up utilities
Net Center - Remote management
IntelliSEAQ™ - Built-in print head reporting

Connectivity for all environments

Optional W-LAN 802.11 B/G with WPA2 security protocol
Standard Ethernet Wired LAN 10/100
