VC80 Vehicle Mount Mobile Computer

GET THE FULL WINDOWS SUPPORT YOU NEED TO PUT YOUR DESKTOP APPLICATIONS AT THE FINGERTIPS OF YOUR VEHICLE OPERATORS

With the VC80, you can give operators in material handling vehicles mobile access to the desktop applications they need to complete tasks faster and more accurately. You get full Windows support in a super rugged design built for your toughest indoor and outdoor environments — from warehouses and distribution centers to airports, seaports, railway yards and more — plus the fastest wireless connections available to keep workers connected to your data and productive. And with its compact design and flexible mounting options, it's easy to install in forklifts, clamp trucks, yard mules, cranes and more. The VC80 — real desktop power to handle your mobile application needs.

Freezer-ready for the coldest supply chain

You get true frost and condensation free operation with touchscreen, board and battery heaters, plus smart temperature sensors that automatically control heater and heating speed.

Maximum rugged design

The VC80 is ready for your toughest environments, with dust-and-water tight IP66 sealing, sealed connectors, and extreme temperature, shock and vibration testing.

Easy to see indoors and outside

Choose either 1,000 NITs for a super bright screen that is easy to see outdoors or 400 NITs for indoor operation.

Programmable keys to simplify the most complex operations

With six direct and six soft programmable keys, multi-step processes can be executed with one keypress, boosting throughput and productivity.

Designed for voice in your loudest environments

The very loud front facing speaker and instantly accessible volume control make it easy to hear scanner feedback and app notifications.

Fits in virtually any warehouse/material handling vehicle

Multiple mounting options, including standard RAM mounts combine with a compact size for an easy fit and easy mounting, even in the smallest vehicles. And a 10-second quick release mount makes it easy to move the VC80 to another vehicle during vehicle maintenance or device repair.

Flexible data entry — touch or optional keyboard

The touchscreen's soft keyboard and haptic vibration feedback make it easy to use touch input, even with the thickest gloves. Or you can choose to mount an optional keyboard on the bottom or side of the VC80.

Power to support today's graphics-intensive applications

Get the power you need to deliver blazing speed for your applications with your choice of a dual core 1.33 GHz with 2GB RAM or a quad core 1.91 GHz processor with 4GB RAM.

Superior flexibility — add bar code scanning, voice and more

Different workers need different capabilities. That's why the VC80 offers all the ports you need to add bar code scanners, mobile printers, a push-to-talk microphone and more.

Rock-solid fast Wi-Fi connectivity

With support for the latest Wi-Fi standards — 802.11a/b/g/n/ac — plus a choice of internal or external antennas, the VC80 can deliver desktop wired-line style performance on the most complex applications.

Repairable, right on the spot

Since the touchscreen — the most frequently damaged component — is field replaceable, trips to the service depot are eliminated, increasing device availability and your return on investment.

Pair Bluetooth devices in a split second

Need a separate handheld scanner? With a quick scan of the pairing bar code printed on the VC80 with Zebra's LS3478 or DS3578 handheld or RS507 ring-style cordless scanners, your workers are up and running.

Comprehensive Windows operating system (OS) support

The VC80 supports Embedded Standard 7 or Windows 7 Professional, and is Windows 10 ready, making it easy to extend virtually any PC-based app to your material handling vehicles.

PUT REAL DESKTOP POWER IN YOUR WAREHOUSE VEHICLES WITH THE VC80.
