

VEHICLE CRADLE FOR ZEBRA MC95

ITEM NUMBER

23-95-09-TKC-01	charging only
23-95-09-TKC-02	with Smart Card Reader

Active vehicle cradle with charging function

The vehicle cradle for Zebra MC95 is a TISPLUS development. It impresses by its functional and compact, but still robust design. The easy insertion of the MC95 with secure locking mechanism allows operation with only one hand.

Installation is also simple: screwing from the front allows for easy installation on the dashboard. The cradle has a wide input voltage range of 9-30V.

With an operating temperature of -20°C to +70°C the cradle goes through temperature fluctuations without any problems and does not limit the application range of the Zebra MC95.

AT A GLANCE

- Functional and stylish, yet durable design
- Easy insertion of the device with secure locking mechanism (one-hand operation!)
- Screwing from the front allows easy installation on the dashboard
- Direct mounting for example with the RAM mount attachment system
- possible on the dashboard or the windshield (with suction cup)
- Optional: Integrated Smart Card Reader
- Wear-free locking mechanism
- Good fixing of connection cables possible
- 100% Made in Germany

NOTE

Our vehicle cradles are delivered with a "charging only" function by default. On request, we integrate options, such as USB or Smart Card Reader for reading of driver cards (digital speedometer) and other smart cards.
