Side view

Mobile device with handle mounted (MC95 not included with delivery)

The TISPLUS Scan Handle for MC95 is a powerful add-on for comfortable handling during data capturing. It offers easy "Snap-on" mounting and a secure lock mechanism combined with an ergonomic design.

With innovative focus on our customers' needs we developed the TISPLUS Scan Handle for the MC95 series, because the device itself does not come with a handle, also the manufacturer does not offer such an item as an additional upgrade.

AT A GLANCE

- Easy mounting, TISPLUS Scan Handle just slides on the device, a mechanism locks the handle and at the same time allows easy dismounting without any tools necessary
- Design of the TISPLUS Scan Handle allows uncomplicated exchange of batteries in the device even with the handle mounted (Hand strap must be removed)
- Camera of the MC95 remains fully functional with the handle mounted
- MC95 can be placed in Motorola docking stations with the handle mounted
- No electric components, trigger of the handle is controlled by a robust mechanism

TECHNICAL SPECIFICATIONS

DIMENSIONS AND WEIGHT

- 160 x 103 x 112 mm
- 130g

ROBUSTNESS

- Trigger made for over 1 million pulls

PROTECTION CLASS

- IP 57
