

Sygic GPS Navigation is the world's most advanced offline navigation app.

130+ million

consumer downloads  
...adds 5 million a month

1500+

fleets

#1 Publisher

on Google Play and iOS by Revenue  
in the Navigation category

110+ countries

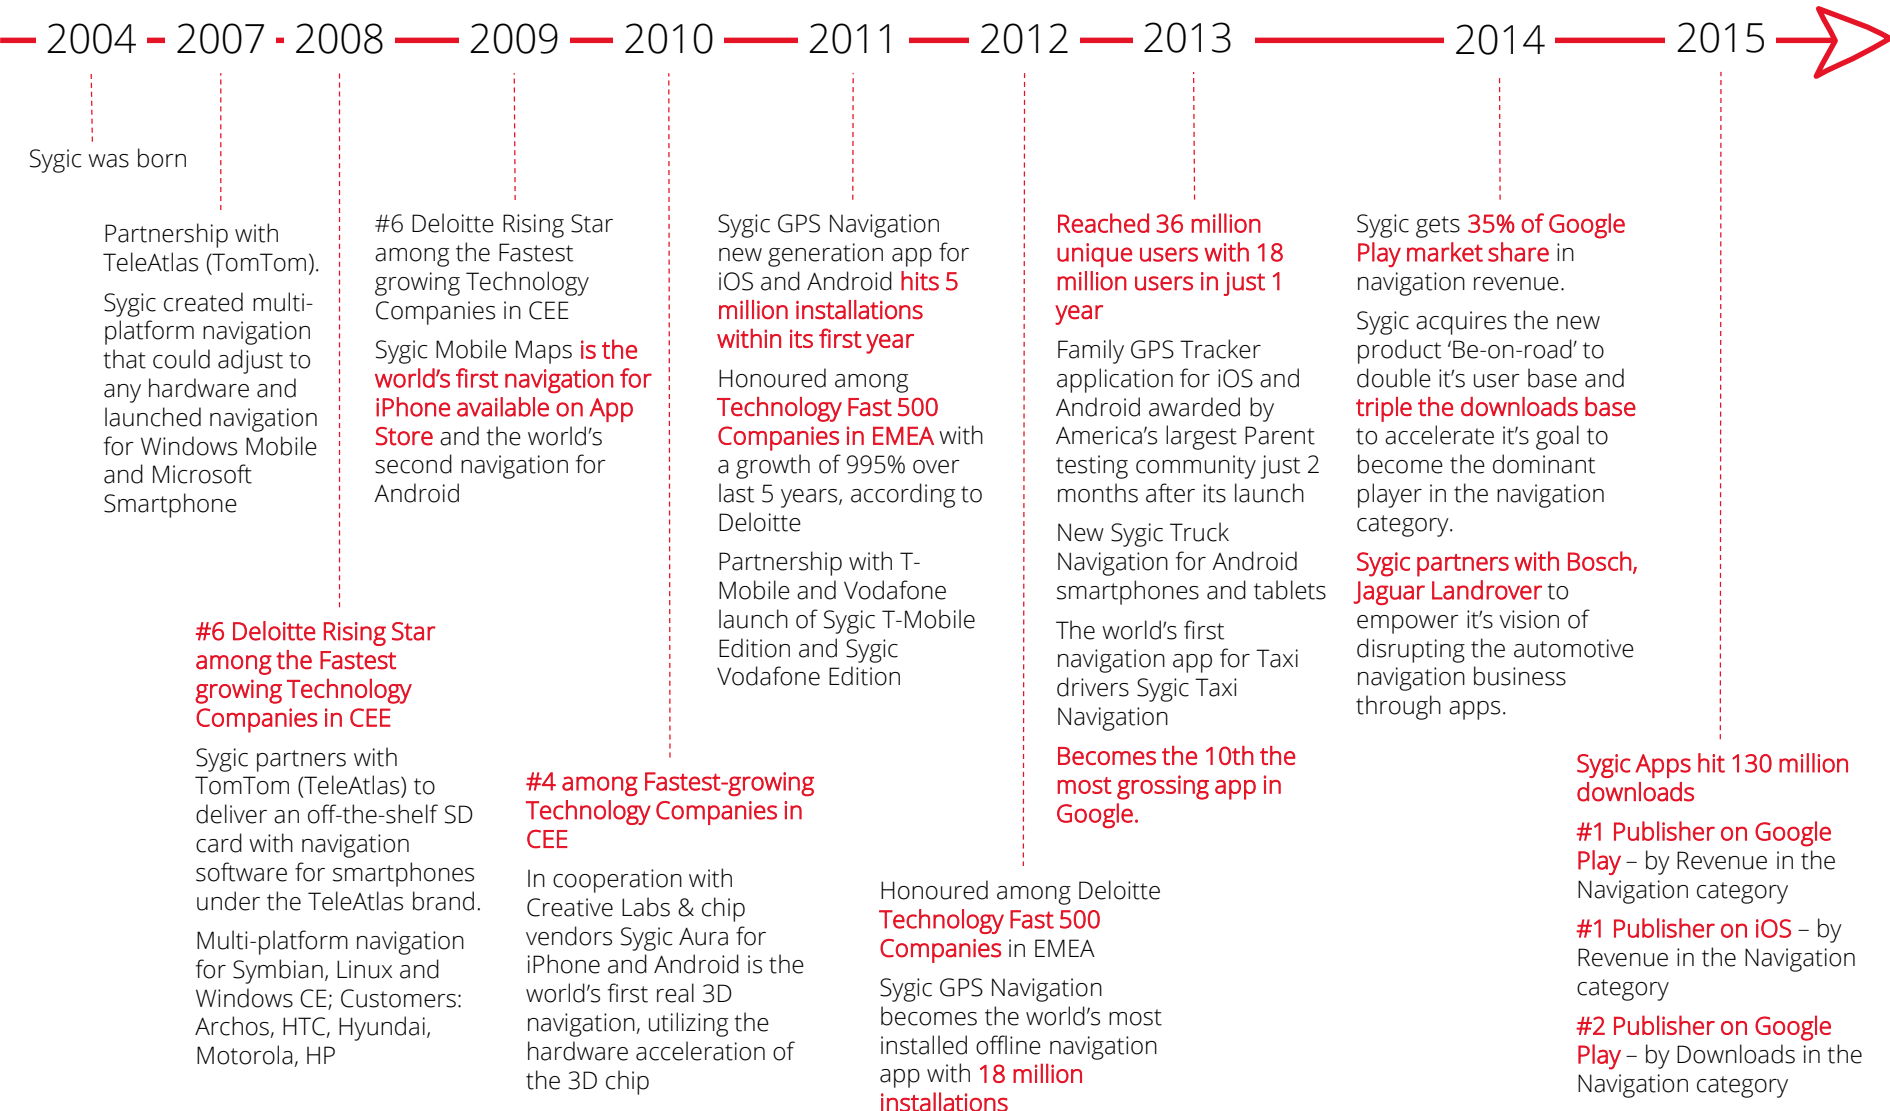

worldwide coverage

250.000+

professional drivers using Sygic Professional Navigation every day

Joining Connected Cars  
automotive business

## Vision

We imagine guiding each and every person on the move.

## Mission

Our mission is to enable people to go anywhere and explore any place with confidence.

## Values

Innovation, staying focused, passion, keeping ourselves challenged, teamwork

# Sygic Truck Navigation

Navigation application that meets truck drivers' needs

# Table of content

- Sygic Truck Navigation
- Product overview
  - Map coverage, available languages, hardware compatibility
- Features
  - Truck attributes
  - Map view
  - Route planning
  - Navigation features
  - Driving safety features
  - Latest innovations
- Integration with 3<sup>rd</sup> party applications

# Sygic Truck Navigation

Navigation using truck-specific routing that automatically avoids roads not suitable for trucks or special cargoes.

- Reduce out-of-route miles with trucks specific routing
- Ensure the delivery arrives safely and on time
- Plan ahead for the entire day and set-up routes with multiple waypoints for loading and unloading
- Track and trace your workers in real time

## OFFLINE NAVIGATION

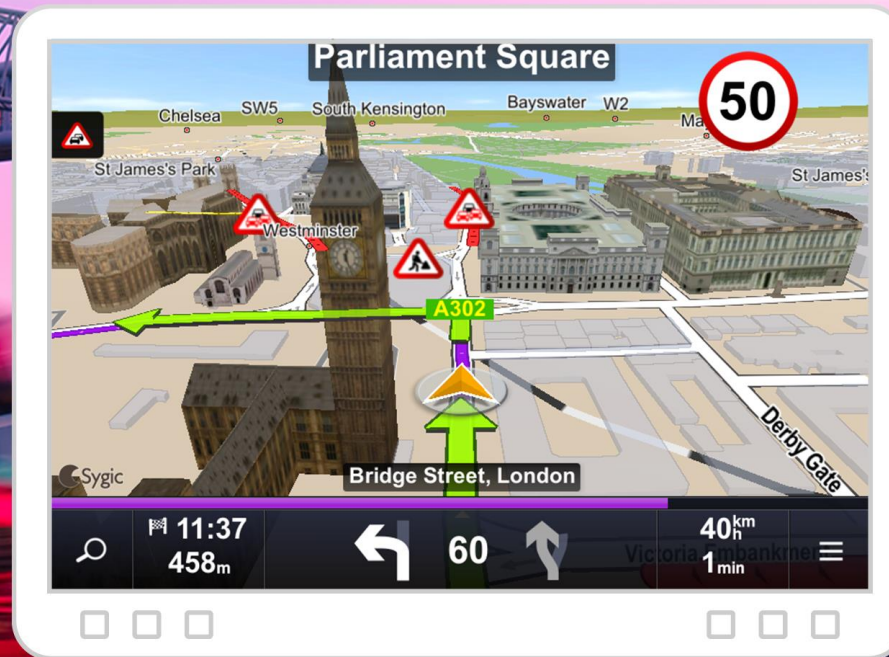

High quality Navteq/HERE maps stored on device. Routing optimized for Trucks & RVs.

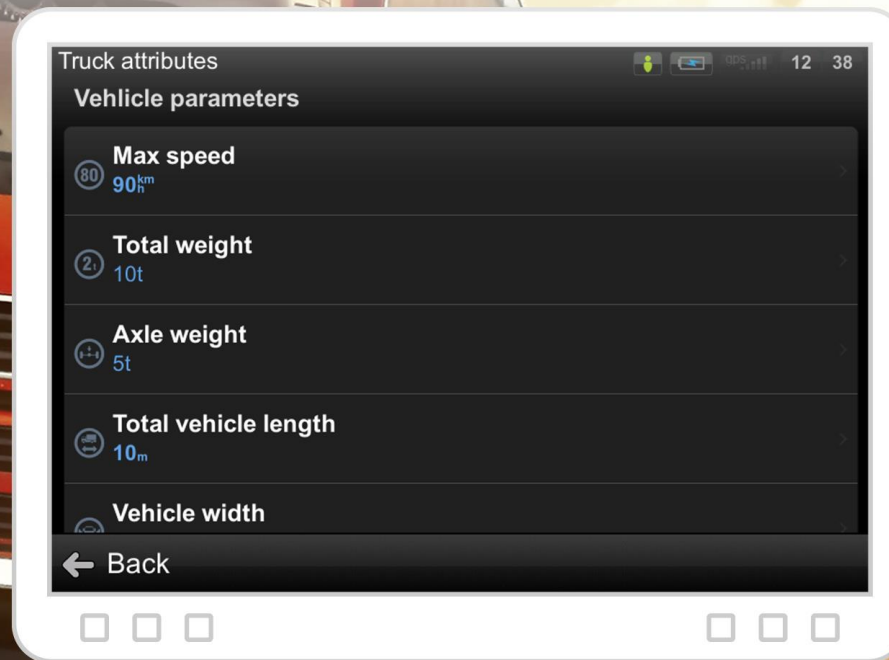

## BEAUTIFUL 3D MAPS

Intuitive interface, 3D cities, lane guidance & landscape for easy orientation.

## SPECIAL TRUCK PARAMETERS

Set truck parameters and hazardous materials and avoid roads not suitable for your vehicle.

## TRUCK POIs

Truck parking, rest stops and petrol stations suitable for large vehicles.

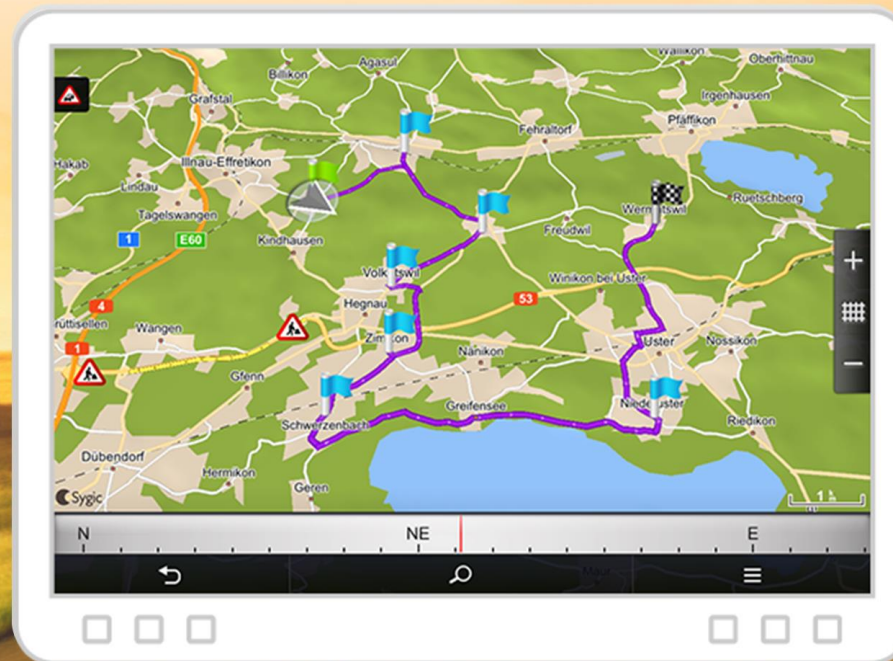

## TRAFFIC INFORMATION

See all the traffic incidents on your route and avoid delays and traffic jams.

## MULTIPLE WAYPOINTS

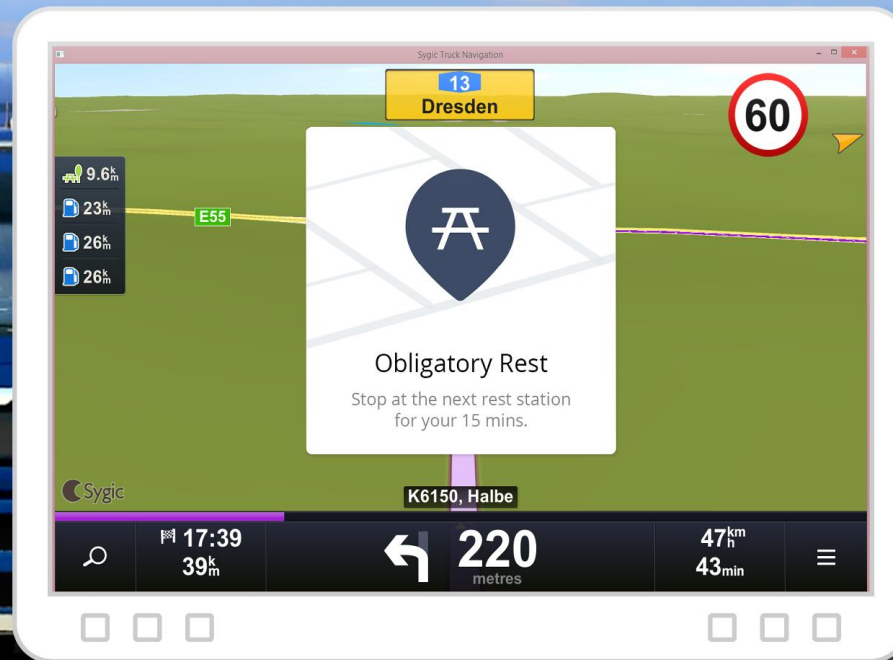

Set-up routes with multiple waypoints for loading/unloading and save route for future.

## REST STOP PLANNING

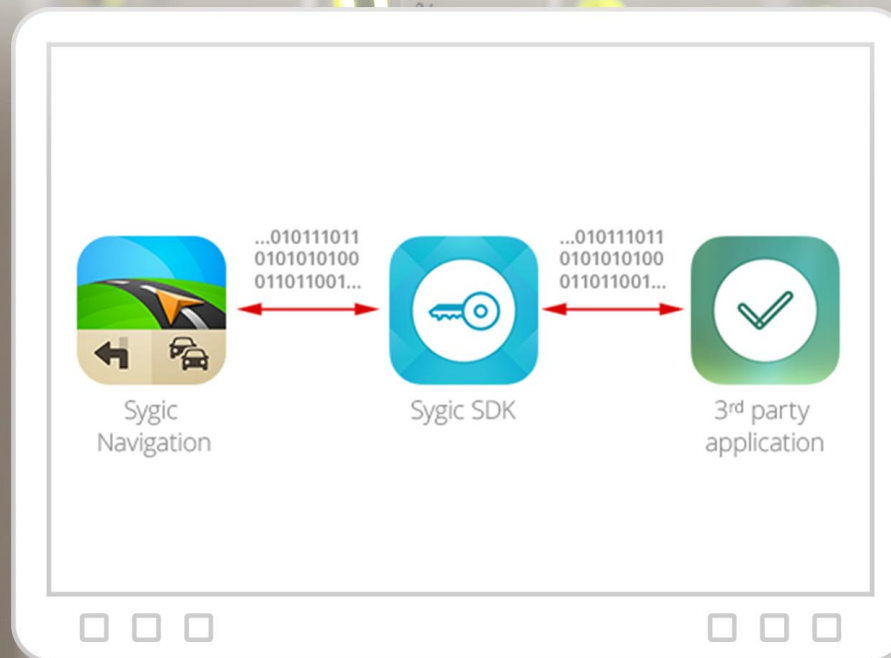

List of fuel stations and highway rest places on the route within the time interval of obligatory stops.

## EASY INTEGRATION TO ANY FLEET SOLUTION

Fleet Navigation with SDK offers over 60 easy-to-use API functions to help create customized solutions.

# Product with rich set of features

Truck attributes, map view, route planning, navigation features

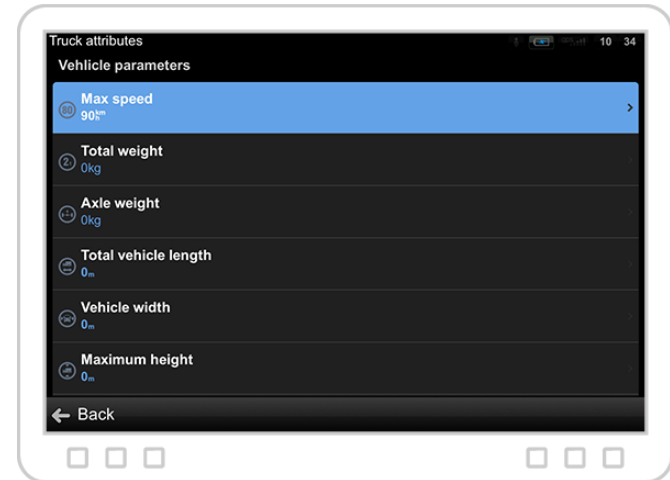

# Truck attributes

## Maps with truck attributes

Warning when entering truck restricted road. Truck parking and petrol stations stored on the device as points of interest (POI) allow drivers to easily locate a place to rest or refuel.

## Set truck parameters and specify hazardous materials

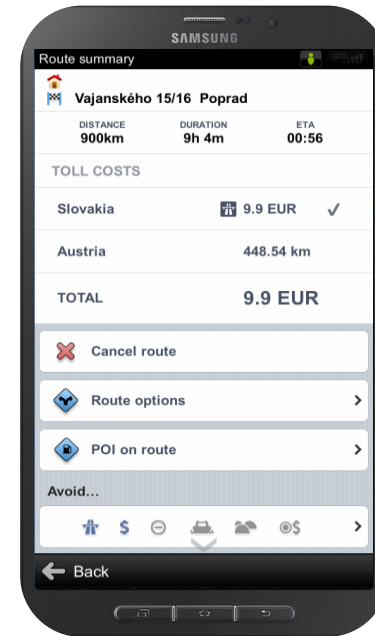

Drivers can enter attributes such as weight, height and hazardous materials restrictions into the navigation system to avoid roads that are not suitable for specific trucks or cargo.

# Truck attributes

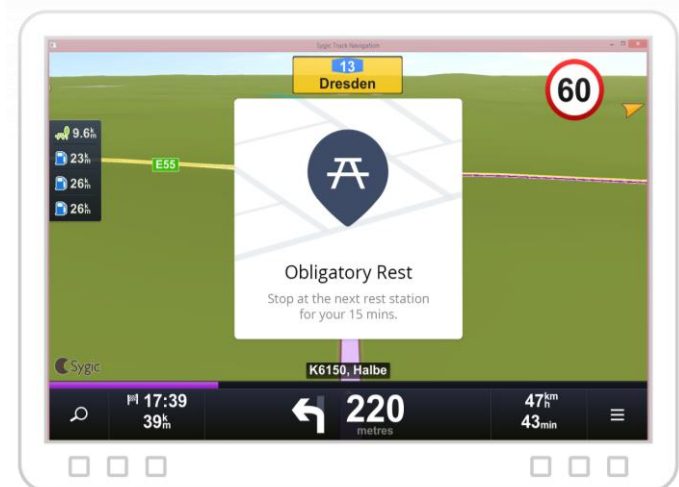

## Toll cost estimation

In certain countries the navigation summarizes estimation of the toll costs for computed route.

## Rest stop planning

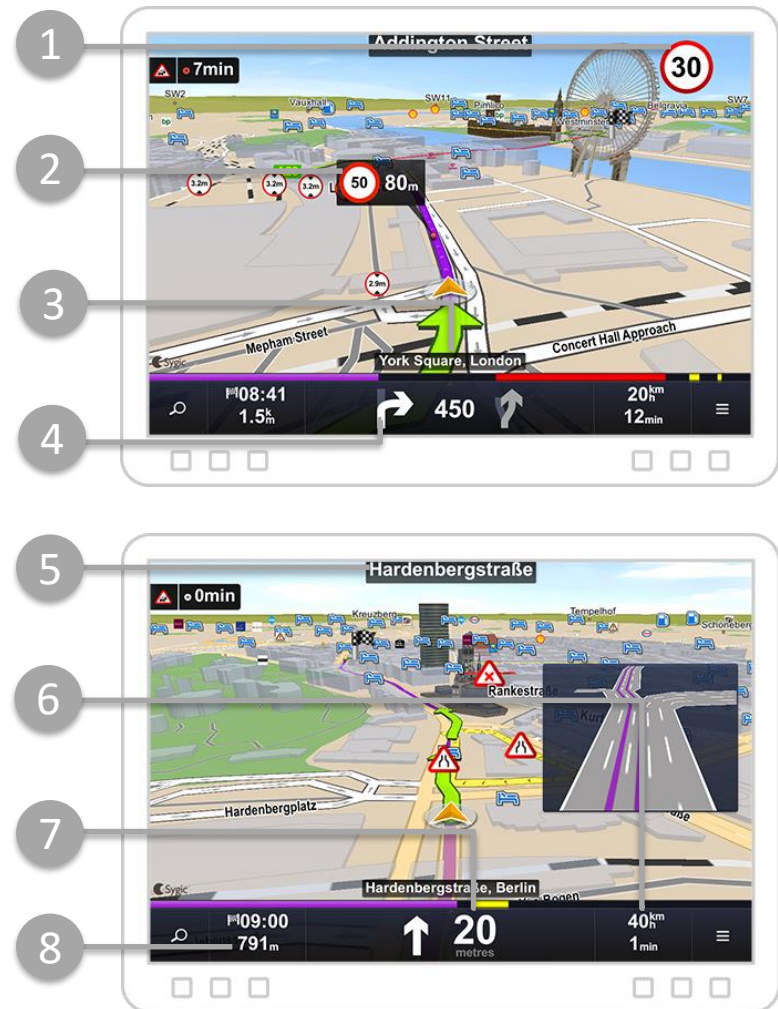

Give your drivers more comfort by providing a list of fuel stations and highway rest places on the route within the time interval of obligatory stops provided by a tachograph (EOBR unit).

# Map view

- Current speed limit (1)
- Upcoming speed limit change (2)
- Next road/street to take (3)
- Next maneuver (4)
- Current road/street (5)
- Current speed (6)
- Distance to next change of direction (7)
- Distance to destination (8)

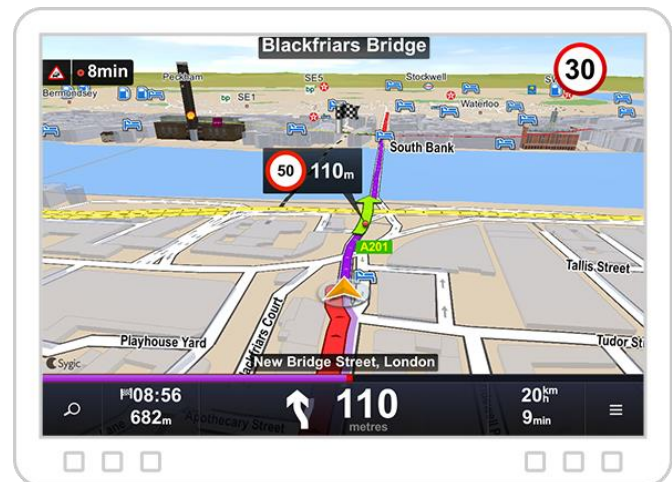

# Map view

- Customizable navigation screen
- Graphic optimized for tablet & HD display
- 2D/3D (bird) view
- Autozoom
- Day/night mode
- Speed camera warnings
- Sidebar with traffic on route, driving instruction

# Map view

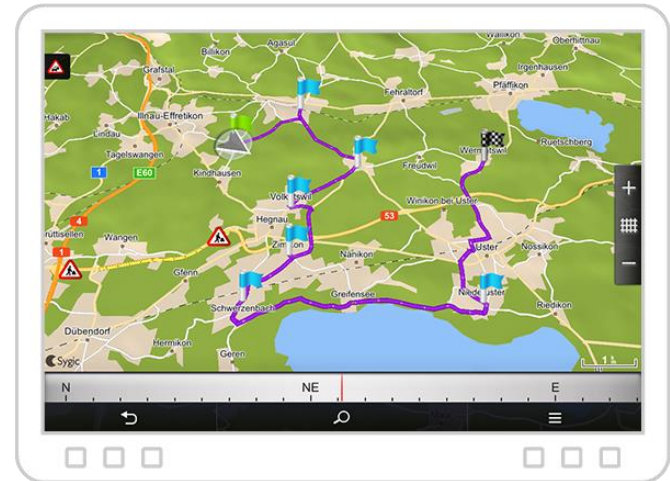

- Easy view of Start point and Destination
- Improved quick access menu
- Smooth Hardware Accelerates 3D rendering
- Traffic flow in 3 colors on the progress bar
- Traffic flows in 3 colors also on map

# Route planning

## Multiple waypoints for loading and unloading

Plan ahead for the entire day and set-up routes with multiple waypoints for loading and unloading.

## POIs on route

Specify POIs on route such as parking, petrol stations, vehicle services and many more.

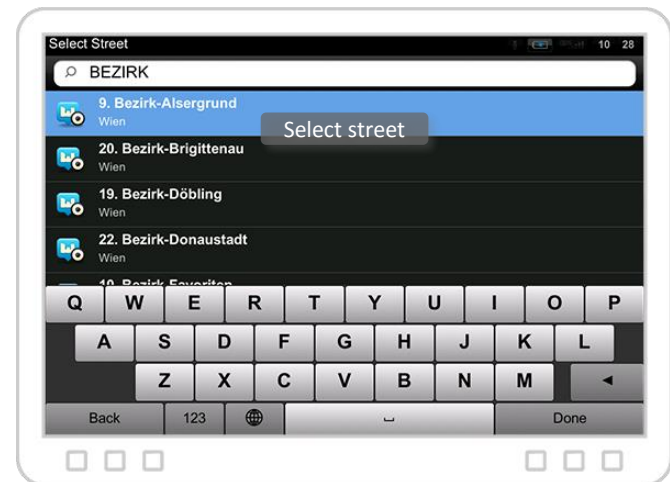

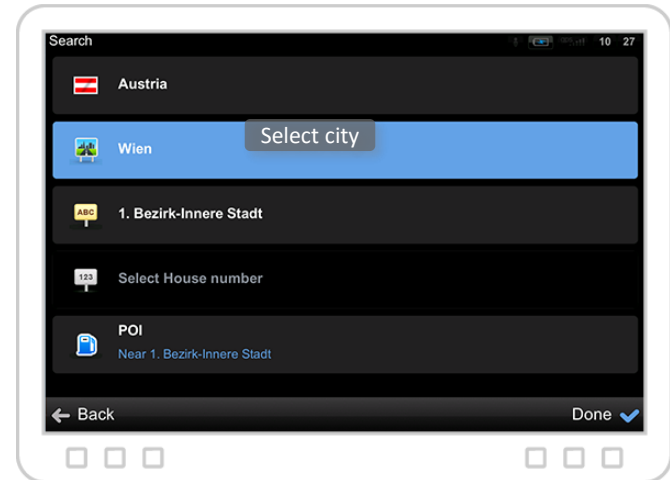

# Route planning

## Street-first or city-first address entry

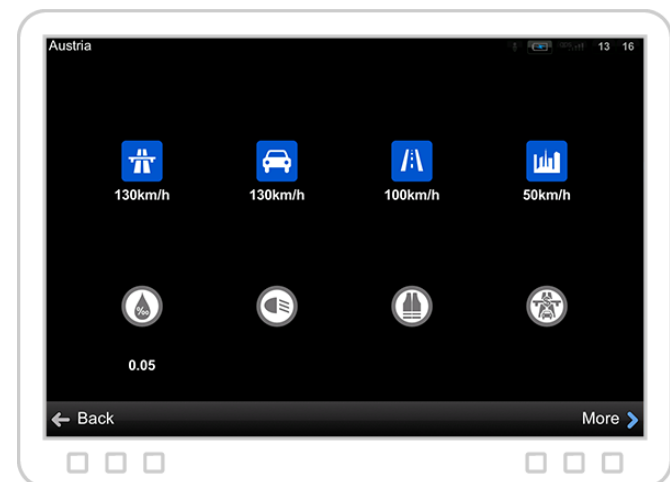

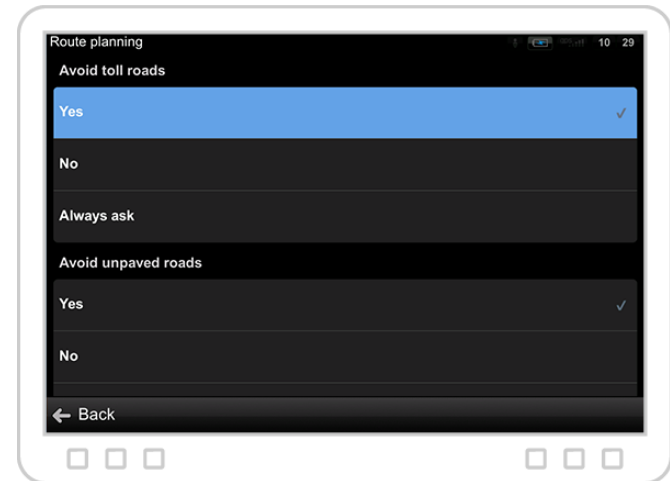

Find a street even when you don't know the name of the city.  
Multilingual names of cities and streets.

Powerful search capabilities  
with easy address search that accepts typos.

# Route planning

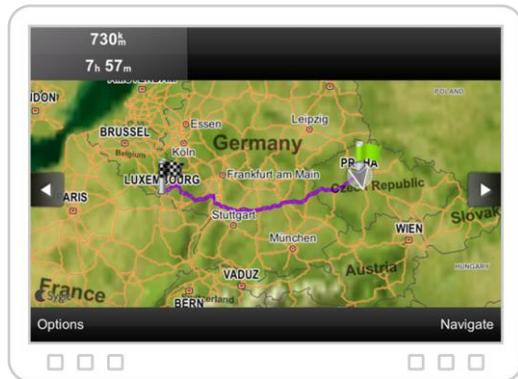

- Avoid toll roads on part or on entire route
- Avoid places, roadblocks, ferries, motorways, unpaved roads
- Drag and drop route editing
- Navigate to address, contact, POI, postal code, intersection, GPS coordinates, geo tagged photo, home, recent destinations, nearby parking
- Import of interesting locations
- Alternative routes

# Speed profiles for better routes and ETA

Calculated ETA is different for each time of day

Morning hours on Monday.

Morning hours during week-end.

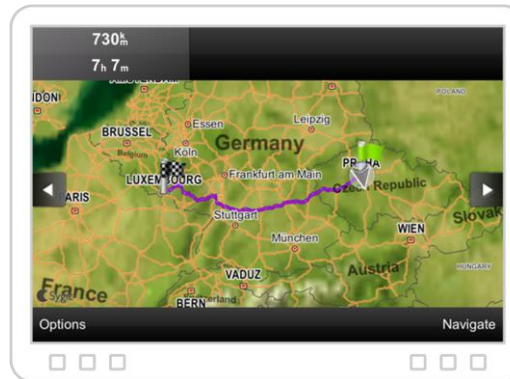

Figure 1. Traditional estimation of travel times from A to B - one value for all times of the day

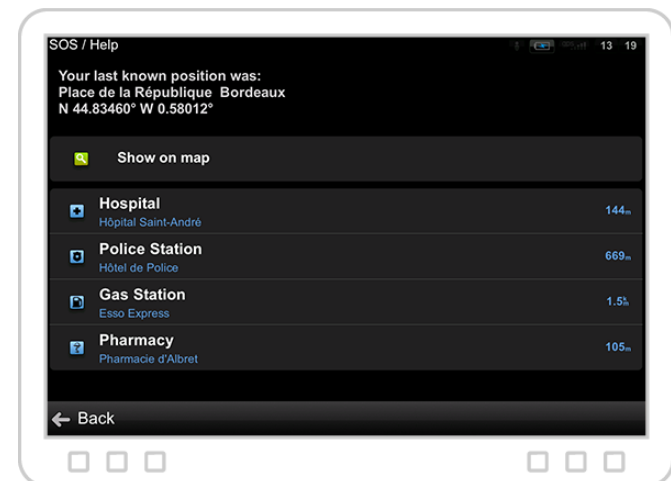

Figure 2. Measured average travel times from A to B during congested morning peak period in Speed Profiles shows a different picture of the fastest route

# Navigation features

- Spoken street names to focus on the road
- Google™ Local Search to find anything
- Sharp curve warning
- Customizable spoken warnings
- Save current location
- Fast automatic recalculation in the event of missed turns
- Text-to-speech capabilities (“turn left on Washington street”)

# Navigation features

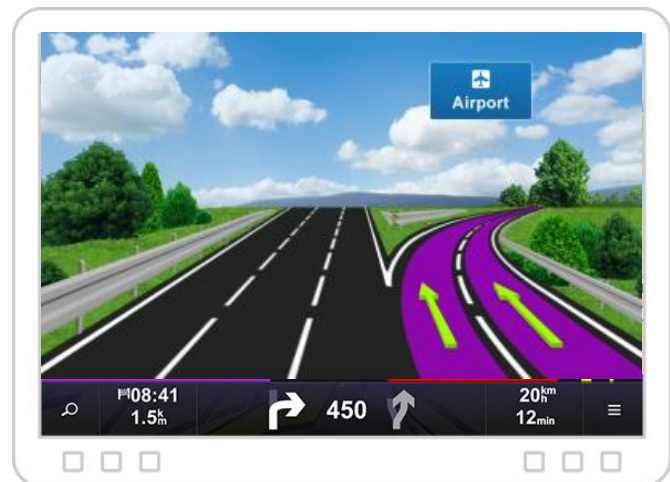

## Real-Time Traffic information to avoid delays and save fuel

Receive warning about traffic, jams and accidents. Choose an alternative route. Available as an add-on service.

## Junction view

Shows the right lane to take when navigating the most difficult junctions.

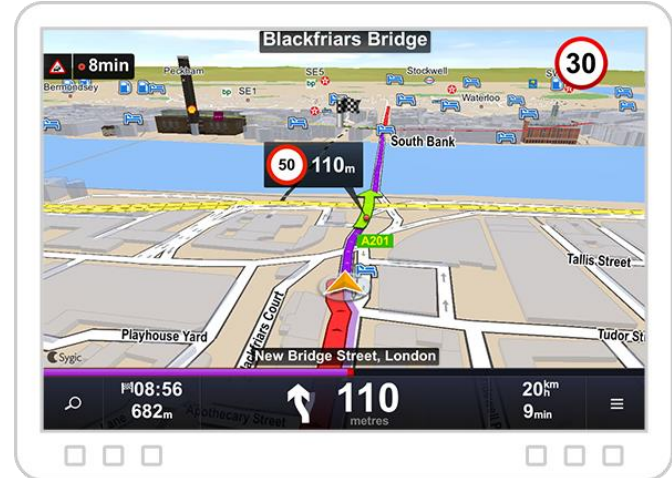

# Driving safety features

Upcoming speed limit changes  
are notified in advance

to increase safety and smooth driving  
experience.

## Dynamic Lane Guidance

Clearly shows all the lanes and highlights  
the one to be in.

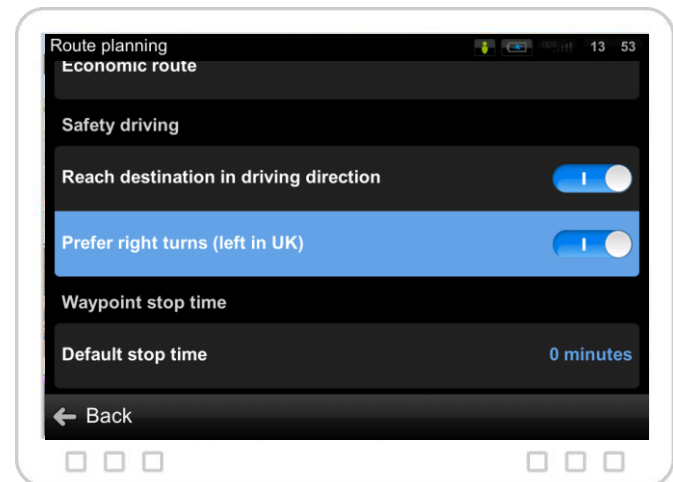

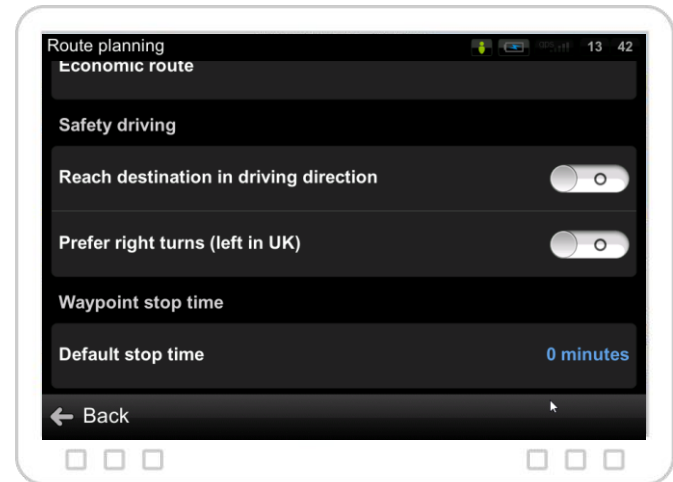

# Driving safety features

## Preferred right (left) turn

Sygic routing algorithm suggests routes that avoid time consuming and dangerous left turns at intersections against the incoming traffic.

## Reach destination in driving direction

Increasing the drivers safety when walking out of the vehicle.

# Driving safety features

## HUD Interface

Brings navigation in driver's line of sight by linking directly with the navigation functions and projecting the route information into built-in screen on dashboard or other visualization systems.

# Latest innovations

## New map look

Introduced based on the feedback from our 130+ million consumer market user base

- Better orientation & greater stability
- New color scheme
- Better readability of different types of roads
- Darker night mode
- Clearer display of buildings

# Latest innovations

## Navigation Sidebar

Custom Sidebar API allowing any component of the fleet solution to be visible and accessible from navigation interface.

## Itinerary management with precise time windows

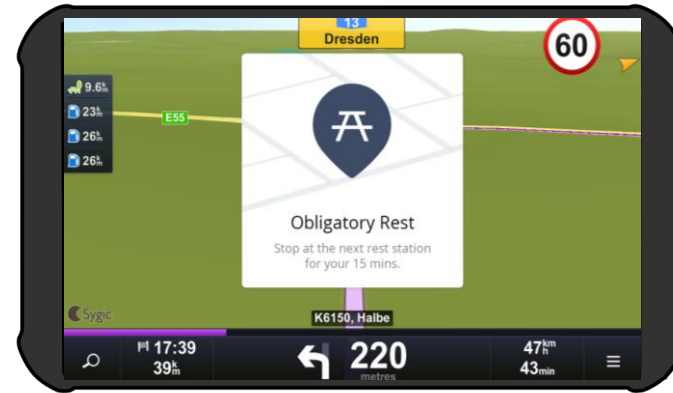

Manage your routes better with multiple waypoints, where each waypoint can have a predefined time window and a stop time.

# Latest innovations

## Rest stop planning

Give your drivers more comfort by providing a list of fuel stations and highway rest places on the route within the time interval of obligatory stops provided by a tachograph (EOBR unit).

# Latest innovations

## Preferred right (left) turn

Sygic routing algorithm suggests routes that avoid time-consuming and dangerous left turns at intersections against the incoming traffic.

# Latest innovations

## Screen saver

Saves your battery life up to 30% simply by turning off the navigation screen when driving on highways. Navigation screen reappears 5 kilometers before the next turn or can be reactivated by simple tap on the screen.

## Back button

Easy way to switch from Sygic Professional Navigation to custom applications.

# Latest Innovations

## Eco driving score

3rd party apps can broadcast information from vehicle directly to the navigation screen while driving.

E.g. Real time eco score can be visualized dynamically based on data provided from external source

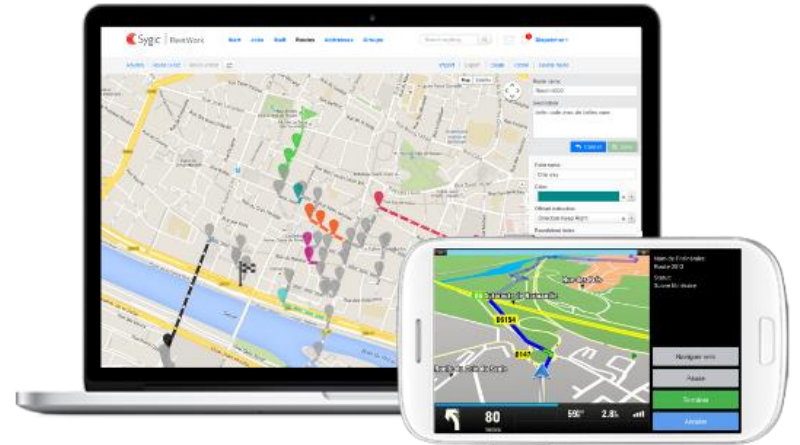

# Sygic Municipal

## Planning and Professional GPS Navigation bundle

Waste collection, snow plowing, green area maintenance and other municipal services which rely on effective field worker management.

- Cut costs and save time on new driver training
- Digitize company routes with an all-in-one solution
- Evaluate drivers' performance

## Sygic Fleetwork (Server)

- Route Editor – create, import, edit routes, add professional instructions
- Routes are map independent
- Using Google maps to ensure the most up to date maps
- Routes and POI synchronisation with drivers OTA
- Route execution monitoring and reporting

## Sygic Municipal (Client)

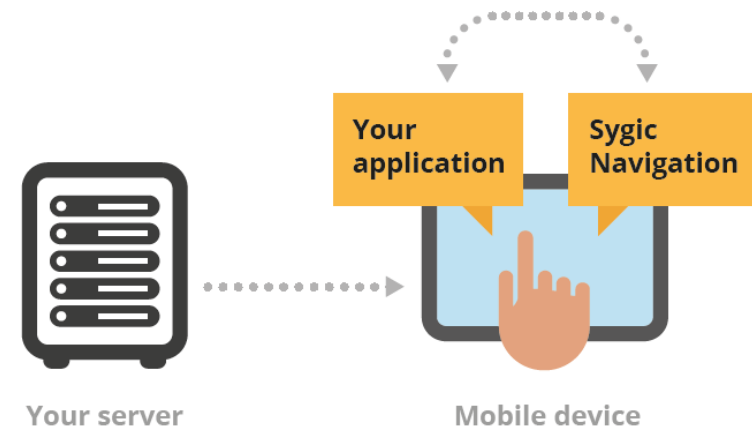

- Normal navigation mode / Following imposed route
- Truck specific routing on professional maps
- Pause and Resume the imposed route
- Avoid a part of imposed route and join the route further, missed segments will be created
- Navigation to custom locations
- Record a route

# Integration with other apps

# Integration with other applications

- GPS Navigation can be seamlessly integrated with other delivery applications to enhance the efficiency of the system
- Enables Fleet operators to send itineraries and instructions directly into the app
- Professional API documentation for Easy integration
